

SENS starts the building of two photovoltaic parks in Toledo

Built on 59 ha of land, both solar parks will avoid the emission of more than 24.000 tons of CO₂ per year

Madrid/Würzburg/Essen. SENS - Iqony Solar Energy Solutions Ibérica starts the construction of two photovoltaic parks in Pepino, Toledo. Both parks, known as Pepino 20 and Pepino 3, will consist of 40,000 modules that will avoid the emission of more than 24 tons of CO₂ into the atmosphere per year, which will considerably reduce the carbon footprint of the entire area.

Pepino 20 and Pepino 3, which will occupy an area of 59 hectares, will have a total capacity of 25.54 MWp and will produce 51,495 MW/hour of energy per year. Both parks will provide green energy to 15,000 households.

SENS is committed to sustainability

"SENS is a company deeply committed to sustainability, care for the environment and reducing its carbon footprint. The construction of these two PV parks is another major step forward in our journey to build a better and cleaner society," says Oscar Page, CEO of SENS Iberia, subsidiary of the German solar provider SENS.

SENS Ibérica started its operations in Spain in 2010. It currently has offices in Madrid, Seville and Lisbon. The company, which has just over 100 employees in Spain and Portugal, combines local knowledge with international experience, which has enabled it to experience rapid and significant growth.

In addition to the development and construction of large-scale photovoltaic plants, SENS offers innovative PV self-consumption solutions for trade and industry. The company has another cross-cutting business line dedicated to the operation and maintenance of PV parks, which is very active in other innovative solutions.

About SENS

SENS, the Iqony Solar Energy Solutions Group, is a service provider based in Würzburg, Germany, with operations in the renewable energy sector in numerous European countries. From project development and turnkey construction of utility-scale solar farms, via operation and maintenance to the creation and implementation of holistic energy solutions for commerce and industry, SENS is the right contact for your needs. SENS is a wholly owned subsidiary of the Essen-based energy company Iqony GmbH, and employs around 350 people at nine locations in Europe.

About Iqony

Iqony makes green energy feasible. With more than 85 years of experience in the planning, construction and operation of energy facilities, the company provides holistic solutions for the decarbonization, decentralization and digitalization of the energy supply. Iqony focuses on renewable energies and bridging technologies that can be used in a climate-neutral way now and in the future. In addition to solar, wind and geothermal energy, the portfolio includes hydrogen solutions, storage technologies, engineering services and gas-fired power plants. Around 2,300 employees worldwide implement projects for major industrial companies, utilities, cities and municipalities in numerous countries across the globe. Specializing in tailor-made solutions for complex challenges, Iqony draws on its broad and in-depth knowledge of the energy industry across the full range of technologies and services.
